

GO ELECTRIC!

Electric vehicles are increasingly popular, due to low running costs and an improving awareness of the environmental benefits.

Ask your employer about charging points at your workplace. Alternatively if you're visiting The Springs, you can charge up there.

To check out the newest makes and models visit:
nextgreencar.com/

What's more, you could save up to £3,500 on the price of a brand new low-emission vehicle through a grant the government gives to vehicle dealerships and manufacturers.

CAR PARKING AT THORPE PARK LEEDS IS LIMITED

Spaces are allocated to each plot number / building; there is no communal car parking available for employees or visitors.

Your employer will be able to let you know what parking is available at your workplace and how it is managed.

We ask that all employees and their visitors are respectful of their neighbours and do not park in spaces belonging to other organisations, or so as to cause an obstruction (as this may result in a health and safety issue).

Please be aware that parking at The Springs is reserved for shoppers and visitors to the retail park, restaurants, gym and cinema (restrictions may apply).

WELCOME TO THORPE PARK, LEEDS

Whilst we encourage those working at, or visiting, Thorpe Park Leeds to walk, cycle or use public transport when they can, we know it's not always practical.

That said, there are lots of ways you can be smarter in the way you use your car to reduce your fuel bill, minimise your environmental impact and help relieve local congestion and parking issues.

Whether you're interested in car sharing or changing to a more environmentally friendly vehicle, this guide provides a summary of your options as well as providing information on car parking.

For more information visit:
Thorpepark-parklife.co.uk

You'll also find lots of information on getting here on foot, by bike and public transport.

COULD YOU CAR SHARE?

Car sharing involves two or more people travelling together, by car. It's a great way to save money on fuel, and it reduces the number of people trying to park at your workplace.

You don't need to car share every day; indeed, a lot of employees have work or home commitments that make this impractical. Just share when you can – you'll still reap the benefits!

You don't need to share for the entire journey; you can pick up someone on your route to work, they don't have to be your neighbour!

You don't need to drive a car to share; you can opt to be the driver, passenger or take it in turns.

You won't be stranded if your car share falls through or if you need to get home urgently; lots of employers offer a guaranteed ride home scheme – ask your HR department for more information.

JOIN OUR CAR SHARE SCHEME

1. Visit liftshare.com/uk/community/thorpe-park-leeds and register for free;
2. Enter your journey details, stating where and when you want to travel;
3. The system will return any suitable matches on a map;
4. If you chose to share with a match, contact is made through the system so it's safe and secure.
